## BIO

I am an all-around stunt performer with a eye for attention to detail and safety. I have been fortunate to have worked with some incredible stunt coordinators throughout my career thus far, and have performed some pretty fun gags on different shows, pulling from an ever-evolving skill set. My specialties include anything equestrian-related, stunt driving/car crashing and being able to take a hard hit- wherever that may take me (onto the ground, into the water, against a wall...etc).

My vehicle work began working in the live stunt show setting, performing rollovers, dive bombers and crashes for the late Tim Chitwood, and being part of the safety extraction crew for other performers. I have been afforded the opportunities to perform several crashes for film/tv including pipe ramps, T-bones, roll overs, etc. I am an instructor at Rick Seaman's East Coast Stunt Driving school (now Stunts Elite) and practice my stunt driving skills regularly. A recent venture into Rally Racing has brought my driving to a new level, and my ability to troubleshoot auto issues and turn some of my own wrenches has been an incredible asset to my stunt driving career.

I grew up riding horses and training/instructing/competing on the regional/national level in dressage, jumping, western, and side saddle. I have performed in several productions as a riding stunt double, as well as trained actors to ride horses for their upcoming projects. I have stunt coordinated a couple productions requiring someone with extensive horse knowledge, and assisted on set with first team and stunt performers for horse-related scenes.

My physical stunt skills range from gags such as a 35' fall off a building on fire into boxes, to getting hit by a car, to falling down stairs multiple times in a day, to jumping off a yacht into a river, fights, falls, rough and tumble type of scuffles, etc. I have basic wire work experience, am comfortable with high falls to 40' and firearms handling.

I am regularly outdoors and have served as a certified Search and Rescue field technician with K-9 unit. Certifications include First Aid, Wilderness First Aid, CPR- w/ AED, FEMA IS-100, IS-200, IS-700, IS-800, and Hazmat Materials.
